

When it comes to tiling, Kyros Ceramics is the go-to destination for all your needs. We are more than just a tile company; we offer a comprehensive range of products that cater to every tiling requirement, ensuring that our customers receive the best possible solutions for their necessity.

At Kyros Ceramics, we understand that tiling is not just about selecting the right tiles. It's also about choosing the right adhesives, grouts, and cleaners to ensure a long-lasting and beautiful finish. That's why we supply high-quality, IS15477-2019 compliant tile adhesives, durable epoxy and cement-based grouts, and specialized tile cleaners that are designed to work seamlessly with our tiles.

Our flagship adhesive, Kyros Grasp, is a polymer-modified, high-strength adhesive that is known for its fast setting, easy application, self-curing properties, water resistance, and flexibility.

The Kyros Grasp line includes three different types of adhesives, each designed for specific applications.

Kyros Grasp (Platinum Type 3) is ideal for large-format vitrified tiles and marble/natural stone on exterior surfaces. Its high bond strength and water resistance make it the perfect choice for exterior applications, ensuring that your tiles stay in place, even in harsh weather conditions.

Kyros Grasp (Gold Type 2) is perfect for interior ceramic, vitrified, and porcelain wall tiles up to 8 feet. Its easy application and fast setting properties make it an ideal choice for applicators, ensuring that you can complete your tiling project quickly and efficiently.

Kyros Grasp (Silver Type 1) delivers exceptional results for interior floor applications with ceramic, vitrified, and porcelain tiles. Its high bond strength and flexibility make it an excellent choice for your home areas, ensuring that your tiles stay in place, even with heavy use.

To complete the tiling process, we offer cement-based polymer grouts in grey, white, and black, suitable for tiles, marble, glass mosaics, and natural stone. These grouts are highly durable and easy to apply, ensuring that your tiles stay in place and look great for years to come.

For ultimate performance, Kyros Grasp Epoxy Grout/Glitter is a 100% epoxy, 3-component system that is easy to use and provides fast curing, efflorescence-free, non-shrinking, and non-sagging joint filling. Its high strength and durability make it an ideal choice for commercial and industrial applications, ensuring that your tiles stay in place, even in the most demanding environments.

To maintain the beauty of your tiled surfaces, Kyros Grasp tile cleaner is a powerful, acid-based solution perfect for daily maintenance. It effectively removes oxide and cement stains from tiles, sanitary ware, marble, and other natural stones, ensuring that your tiles look great for years to come.

At Kyros Ceramics, we are committed to providing our customers with the best possible solutions for their tiling needs. Our comprehensive range of products, combined with our expert knowledge and exceptional customer service, make us the ideal partner for any tiling project. Whether you're a professional contractor or a retailer, we have the products and expertise to help you achieve the perfect finish, every time.
